

ARYAN SINGH

Frontend Developer • ECE Undergrad @ Acharya Institute of Technology

+91-9026253709 aryansingh345as@gmail.com [linkedin.com/in/aryan-singh-77as](https://www.linkedin.com/in/aryan-singh-77as) github.com/aryanlegit777

PROFESSIONAL SUMMARY

3rd-year ECE undergraduate with hands-on frontend development experience using AI-assisted workflows. Built the complete frontend for KAVACH — a real-time AI fraud detection platform — as part of a team that placed 4th at TRIGGER 2K26 hackathon. Co-pitched GramSehat, a rural AI health platform, at AICTE Ideathon. Fast learner who can ship UI quickly using modern tools. Looking for an internship where I can contribute from day one and grow into a stronger developer.

SKILLS & TOOLS

Frontend

- **HTML5, CSS3** — structure and styling of web pages
- **React** — building component-based UI (via AI-assisted development)
- **Responsive design** — mobile-friendly layouts and user interfaces

AI-Assisted Development Tools

- **Cursor, GitHub Copilot, Claude** — building and shipping frontend projects end-to-end
- **Codex CLI** — AI-powered coding via command line for fast scaffolding and debugging
- **Antigravity** — AI development workflow tool for rapid project generation
- Strong at **prompt engineering** — breaking down UI requirements and directing AI output effectively

Tools & Basics

- **Git & GitHub** — version control basics
- **Figma** — basic UI design and wireframing

Currently Learning

- **JavaScript fundamentals** — moving from AI-generated to hand-written code
- **Python basics** — understanding backend code and APIs

PROJECTS

KAVACH — AI Fraud Detection Platform (Frontend Contributor)

[\[React\]](#) [\[HTML/CSS\]](#) [\[Cursor\]](#) [\[Codex CLI\]](#) [\[Team Project\]](#) [\[Hackathon\]](#)

- Built the **complete frontend** of a real-time AI fraud detection platform as part of a 2-person team.
- Designed and developed the **landing page** and the **main app interface** where users paste suspicious messages and receive a threat score.
- Platform analyzes SMS messages for phishing attacks targeting Indian users — designed to be simple and accessible for non-technical users.
- Team placed **4th at TRIGGER 2K26 hackathon** (RR College of Engineering) competing against 100+ teams in the AI/ML domain.

HACKATHONS & AWARDS

4th Place — TRIGGER 2K26, RR College of Engineering

AI/ML domain · Frontend contributor on KAVACH · Competed against 100+ teams

4th Place — AICTE Ideathon, Acharya Institute of Technology

Co-pitched GramSehat — a rural AI health platform grounded in village field research · Recognized for social impact

EDUCATION

Acharya Institute of Technology, Bengaluru · Expected 2028

B.E. in Electronics & Communication Engineering | GPA: 7.6 / 10.0 | 5th Semester

Open to internships · Available immediately · Bengaluru / Remote / Relocate
